Prol 120 mod twin	KR9345(6)7(2)x-xxxx-xx-xx		750x145x100

2 installation

Please make sure that main voltage is disconnected before proceeding!

To install the plasterkit, see installation manual KR8050002138. supply power at the correct position, see orderform!

before removing the brackets, make sure there is no plaster residue left between the bracket and the plasterkit profile, use stanley knife to remove the residue if necessary. Do not damage the paint in the process!

Unscrew the sheet metal brackets. Keep the M4 screws for fixing the main profile to the plasterkit. Do not unscrew the middle screw!
3 installation

Female connector   Male connector

In case of several pieces, connect the profiles with the connection brackets. Slide the small brackets into the profile, and afterwards slide the big brackets on top. Ficate everything with the M4 nuts

Make power connection to female connector, see order form for used ciruits.

Make correct connection with male connector in the luminaire, only use single core wiring.
4 installation

Use strain relief for power supply.

Add the main profile to the plasterkit.

Fix the main profile to the plasterkit brackets with the added screws.

5 | **installation**

Arrange the modules on a flat, clean table. Modules are labeled 1 2, 2 3, 3 4....5 6. Nr.1 inside the main profile indicates where to start.
1: add safety cables 2: connect module connector to flat cable

1: Add cable to fall safety at both ends for each module.

6 | **installation**
2: Connect connector to flat cable
Click the modules in the main profile.

Click the covers to the main profile.

7 | **installation**

To remove the module or cover use the remover tool. Slide the tool between cover and endcap main profile until it snaps.

Pull at the remover tool and remove the module or cover.

Remove cable from fall safety at both ends.

When the fall safety is unlocked, support the profile to avoid falling.
