

# Shaver Light Installation Instructions Issue 2 17/5/02

Please read these instructions carefully before commencing work.

## Warning

Ensure that the electrical supply is disconnected at the fuse board!

This is a Class 2 product and must not be earthed!

This product is not suitable for mounting on a normally combustible material eg wood or polystyrene tiles!

- 1 If removing an existing fitting note all the connections and which wires are connected to the light fitting.
- 2 Identify where supply cables are before drilling holes to avoid damage when drilling the fixing holes.
- 3 Having unpacked the product remove the 2 screws from the glass cover and lift off.
- 4 Feed the supply cable through the cable entry hole in the plastic back plate then connect the supply cable as follows:  
Connect the live supply cable (normally red) to the terminal marked L  
Connect the neutral supply cable (normally black) to the terminal marked N.  
Check that all the connections are secure and that no bare wires are showing.
- 5 When mounting the fitting use the fixings provided or ensure that suitable fixings are used to support the weight of the product.
- 6 When fixing the light ensure that no wires are trapped or crushed behind the fitting.
- 7 Fit the bulb (not supplied) 2 x 40w SES candle maximum then re-fit the glass cover.  
Do not overtighten the screws!

If you experience any problems please consult a qualified electrician.
